*Class 12 - **Percentage - 95.4%*** *Karimnagar, India*

SKILLS

- Data Structures & Algorithms
- DBMS
- Web Development
- Problem Solving
- UI/UX Designing
- Time Management
- Communication

PROJECTS

Fraud Detection in Transactions ⤢ | Java (HashMap, Sliding Window)
- **A Java-based real-time fraud detection system that uses a sliding window logic to monitor transactions and flags suspicious activities instantly. Ideal for FinTech or payment security simulations.**
- Live site here

Git Simulator using DSA ⤢ | Java (Stacks, Queues, OOP)
- **A command-line Git version control simulator built entirely in Java, demonstrating core Data Structures and Algorithms concepts through branching, committing, and version management operations.**
- Live site here

Feedback Collector App ⤢ | React.js, Tailwind CSS
- **A simple, responsive web application that allows users to submit, categorize, and manage feedback efficiently. Perfect for startups, product teams, and internal tools.**
- Live site here

Personal Portfolio Website ⤢ | HTML, CSS
- **My very first project : a portfolio built with HTML and CSS, showcasing my skills, completed projects, and contact links in a clean and structured layout.**
- Live site here
